-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's election without traverse of Group I, claims 1-8, in the reply filed on 20 May 2005 is acknowledged.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 4-8 are rejected under 35 U.S.C. 102(a or e) as being anticipated by Jolliffe (U.S. 2001/0033911).

See Figure 1 and the abstract for a sheet fence with openings with a continuous strip with indicia laminated onto the sheet. The lamination of Jolliffe encapsulates and uses heat and pressure as well as adhesive (section 0015 and 0016).

Art Unit: 1772

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jolliffe (U.S. 2001/0033911 A1) in view of Beretta et al. (U.S. 5,667,869).

Jolliffe teaches a sheet fence with holes and a laminated strip of indicia as noted above. Beretta et al. teach a fence or geo fabric sheet structure with holes formed by orientation of a sheet with recesses. The instant invention claims a sheet fence with holes formed by orientation in different directions. It would have been obvious to one of ordinary skill in the art to have formed the sheet structure of Jolliffe by orienting a sheet with recesses in order to have a sheet with greater mechanical strength because of the teachings of Beretta et al.
